SUMMARY

M.Sc. Digital Engineering student at Otto von Guericke University Magdeburg with **3.5+ years of professional software engineering experience** developing digital solutions, AI-powered applications, and robust data pipelines. Proven background in integrating LLM APIs, building automated document-processing workflows, and maintaining scalable relational database systems (PostgreSQL, SQL). Experienced in driving end-to-end projects with high autonomy within agile, cross-functional teams.

EDUCATION

Otto von Guericke University Magdeburg, Germany

Apr 2025 – Apr 2028

M.Sc. Digital Engineering (Computer Science)

- Focus: Software Engineering, Distributed Systems, AI Systems, Data Engineering.

P.E.S College of Engineering, India

Apr 2017 – Aug 2021

Bachelor of Engineering (Mechanical Engineering)

EXPERIENCE

LabThunder by Be2Byte GmbH, Germany

Aug 2026 – Present

SDET (Software Development Engineer in Test) | Part-time / Working Student

- Designed and executed end-to-end testing procedures across the SaaS ERP and Thunder AI platforms, ensuring system stability, performance, and data accuracy.
- Translated business requirements into technical user stories, acceptance criteria, and system flow diagrams to guide development sprints.
- Authored technical documentation and API specifications, collaborating closely with cross-functional Agile/Scrum teams to triage bugs and validate releases.

Infopine Consultancy Services Pvt Ltd, India

Jan 2023 – Feb 2025

Associate Software Engineer | Full-time, On-site

- Developed and delivered digital business solutions for 30+ enterprise clients using Java, SQL, REST APIs, and PostgreSQL.
- Analysed business processes and stakeholder requirements to design scalable billing, inventory, and order management solutions.
- Collaborated with cross-functional stakeholders to identify requirements and implement scalable solutions
- Maintained CI/CD pipelines and Docker-based deployments in Agile/Scrum teams
- Worked extensively with Git and Jira in collaborative development teams

Infopine Consultancy Services Pvt Ltd, India

Aug 2021 – Dec 2022

Trainee Software Engineer

- Contributed to digital solution implementation and business process mapping
- Supported data analysis, debugging, and system integration tasks
- Collaborated in Agile teams using Git and Jira

PROJECTS

Newborn Weight Prediction: MLOps Pipeline

Mar 2026 – Present

Tech Stack: Python, Pandas, NumPy, Scikit-learn, MLOps, PostgreSQL, Docker, REST APIs

- Developed an end-to-end ML pipeline for newborn weight prediction using real-world healthcare data, covering preprocessing, model training, evaluation, and containerized deployment.
- Built reproducible data pipelines with automated preprocessing and data validation to ensure reliable model development.
- Compared multiple machine learning models using domain-specific healthcare evaluation metrics and selected the best-performing model.
- Documented the system architecture and ML workflow, enabling effective collaboration with technical and non-technical stakeholders.

Enterprise Cost Estimation & AI Integration App

Nov 2025 – Jun 2026

Tech Stack: TypeScript, React, PostgreSQL, Node.js, OCR, OpenAI API | Client: ATA Anlagentechnik GmbH & Co. KG.

- Developed an LLM-powered AI assistant using the OpenAI API for intelligent document processing and quotation generation.
- Built OCR-based data extraction pipelines to transform unstructured engineering documents into structured PostgreSQL data
- Delivered the solution end-to-end, from requirements gathering and architecture design to implementation, testing, and documentation.
- Drove project independently with high degree of autonomy from idea to implementation

TECHNICAL SKILLS

AI & Machine Learning: LLM Integration, OpenAI API, AI Agents, MLOps, Scikit-learn, Pandas, NumPy

Data & Databases: SQL, PostgreSQL, MySQL, Data Modeling, ETL Pipelines, Data Validation

Programming & Backend: Python, Java, TypeScript, JavaScript, Spring Boot, REST APIs, Node.js

Low-Code / Platforms: Microsoft Power Platform (PowerApps, Power Automate), Palantir Foundry (Fundamentals)

DevOps & Collaboration: Docker, Git, CI/CD, Jenkins, Jira, Confluence, Agile/Scrum

Methodologies: Business Process Optimization, Digital Transformation, Technical Documentation

INTERESTS & ACTIVITIES

- Member of OVGU Academic Club, organised career events, recruiter networking sessions, and job seeker workshops connecting students with industry professionals

LANGUAGES

English: C1 (Business Proficiency)

German: B1 (actively improving)
